Humboldt Transit Authority

# IMPROVING INTERCITY TRAVEL IN THE NORTH STATE

### CIBS Network

The California Intercity Bus Network is a state-wide intercity bus network comprised of multiple regional networks. This network was developed through the California Intercity Bus Study (CIBS), which includes an evaluation of network delivery strategies based on local and state funding opportunities.

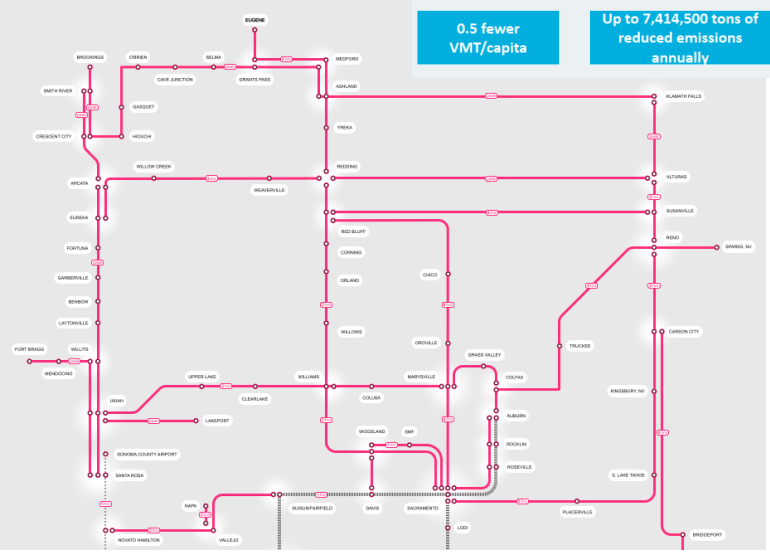

The CIBS network could provide an expansive intercity bus network across the State...

- 37 routes
- 56,820,500 potential riders annually
- 0.5 fewer VMT/capita
- Up to 7,414,500 tons of reduced emissions annually

...improving access to rural and priority population areas...

Connecting to 90% of priority population census tracts (within 15mi)

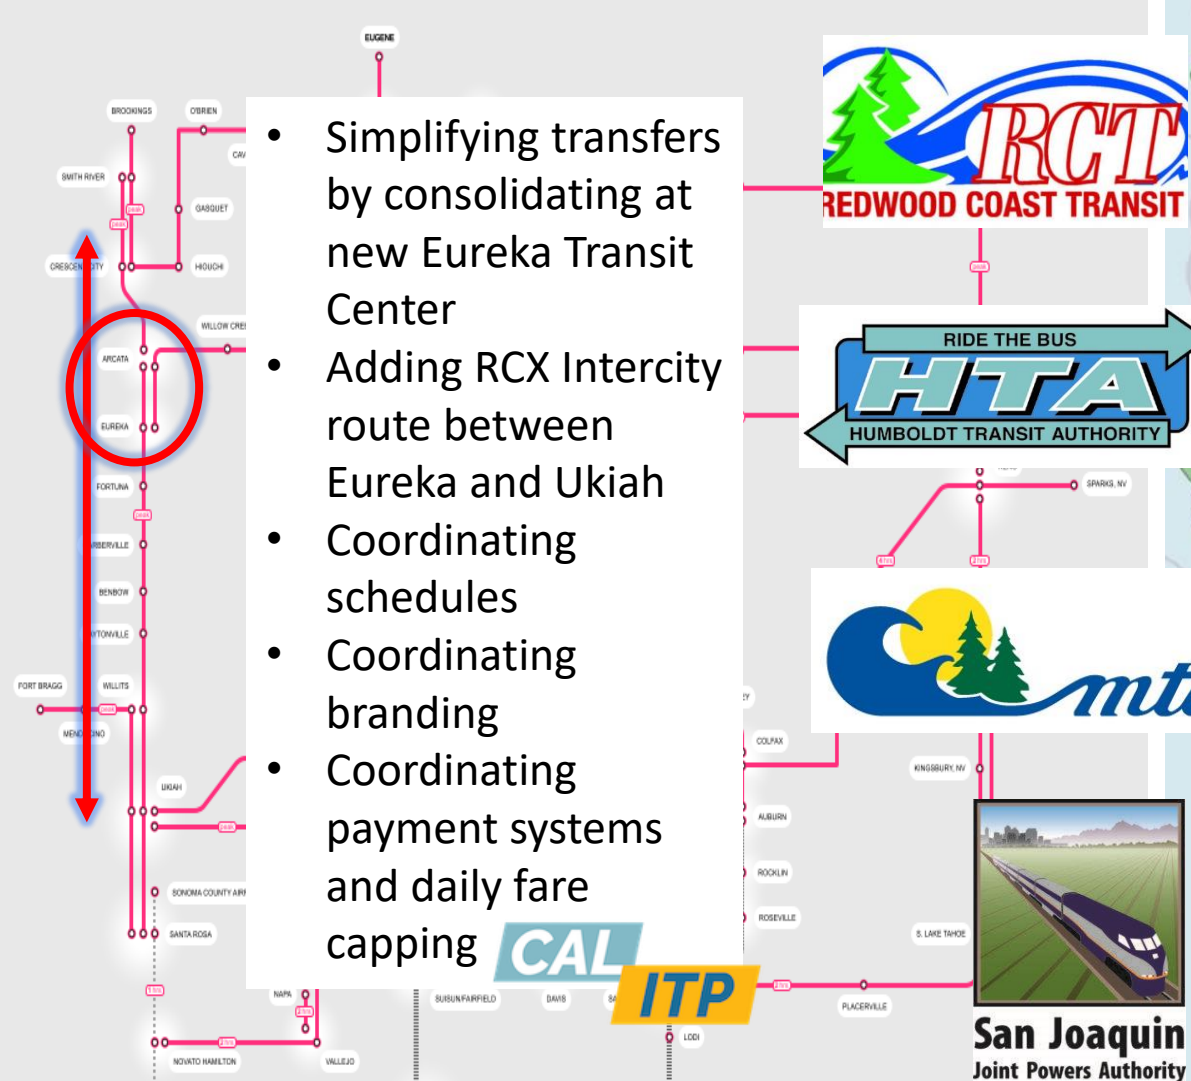

... while improving customer experience and reducing traffic congestion and GHG emissions.
